

## **4380 AUTOMATED EXTERNAL DEFIBRILLATORS**

Edenton Chowan Schools is committed to the health and safety of its students, faculty, staff, and visitors. For this reason, automated External Defibrillators (AED's) have been installed in a central safe location in each school. During normal school hours, the AED can be accessed and used by trained school personnel on a victim that exhibits symptoms of sudden cardiac arrest.

~~The AED procedure will describe detailed specific instructions as to the required AED training, medical oversight, event response, post event process, maintenance, and quality assurance. The AED procedure will be reviewed annually and updated as necessary to reflect scientific evidenced based best practices in emergency cardiac care.~~

To the extent funding, staff, and training are available, the superintendent is authorized to acquire AEDs for use at designated schools and events. The superintendent is further authorized to develop a program to address access to and training, use, and maintenance of AEDs in the school system. All such AEDs and any program developed must comply with the requirements of state and federal law.

The superintendent, in consultation with medical professionals trained in cardiopulmonary resuscitation (CPR) and AED use, shall develop procedures to implement this policy. Procedures must include information regarding:

1. Medical/healthcare provider oversight: Choice of AED devices will be made in consultation with a physician licensed by the state of North Carolina. Preference will be given to machines that offer both adult and child settings. The type of AED product must be one that is approved by the United States Food and Drug Administration.
2. CPR and AED use training for anticipated responders: Training will be completed in accordance with nationally recognized training programs including those approved and provided by the American Heart Association or American Red Cross. Appropriate records of training will be maintained.
3. Coordination with the emergency medical services (EMS) system: Appropriate local EMS officials must be notified of the location and most recent placement of AEDs within a reasonable period of time of placement.
4. Appropriate device maintenance and testing.
5. Placement of AEDs.

The superintendent or designee shall report to the board on the plan for and actual use of AEDs in the school system. The superintendent shall designate a program coordinator to manage the AED program in the schools.

Nothing in this policy should be construed to require the presence or use of an AED on school property or at school sponsored events, unless otherwise required by law. The board cannot and does not guarantee that an AED or a person trained in its use will be available at any particular school site or school-sponsored event.

The board and its employees expressly reserve all immunities from civil liability which are available to them under state or federal law, including governmental immunity and the statutory immunities set forth in North Carolina General Statutes 90-21.14, 90-21.15 and 115C-375.1 and federal statute 42 U.S.C. 238q.
